

IN THE BOX **TOOLS NEEDED**

CONTENT OF PARTS BOX

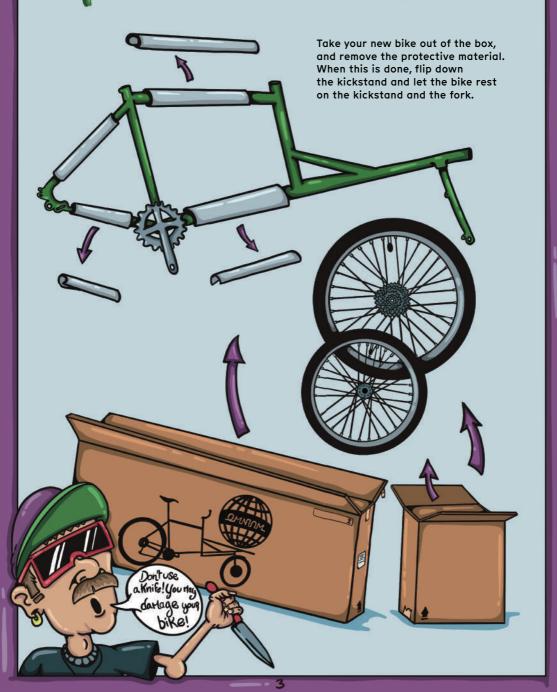

- 1. Cargo saddle
- 2. Seatpost 31,6 mm
- 3. Cargo pedals
- 4. Stem 80mm
- 5. Spacers 4x spacer
- 6. Rack bolts (4x)
- 7. Touch up paint
- 8. Rear axle
- **9.** Mudguard stays (2x straight stay's 2x V-stay's
- 10. Mudguard mount bolts

CONTENT OF WHEELBOX

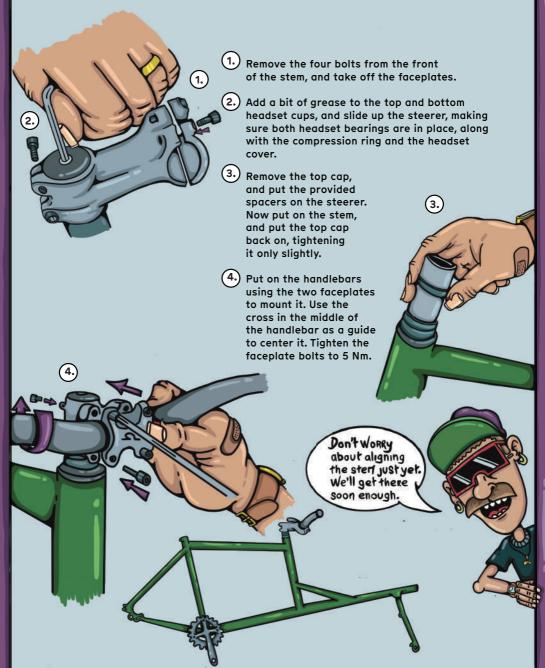

10mm wrench T25 6mm 5mm 4mm

- **A.** Rear wheel with tube, tire and cassette mounted.
- **B.** Front wheel with tube and tire mounted.
- **C.** 2x 160mm 6 bolt rotor with 12 torx-25 rotorbolts (in a envelope)
- D. Rear and front fender

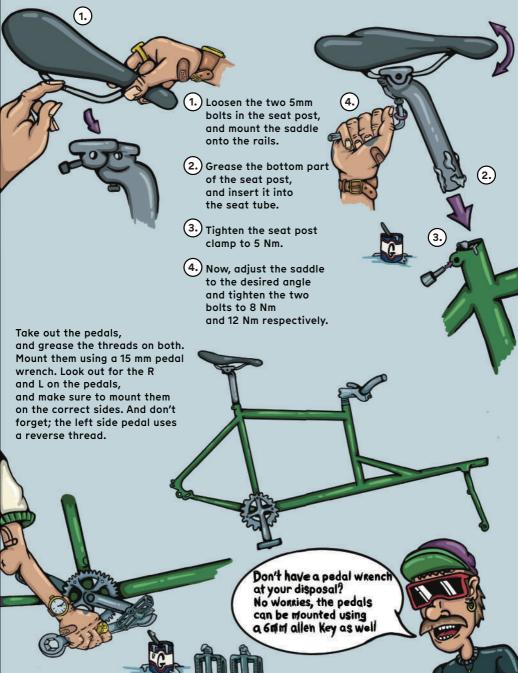

2. REHOVE PROESTIVE NATERIAL

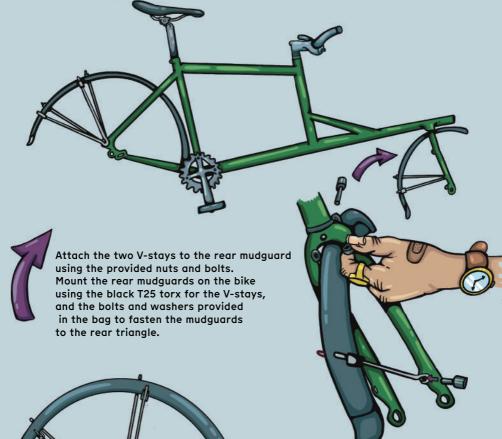

Dan't forget to take out the Wheels before you install the Mudguards.
Or it just ain't happening!
Once installed, put the Wheels back on to adjust the Mudguards.

Attach the two straight stays to the front mudguard using the two nuts and bolts provided.

Attach the stays to the front fork using the black T25 torx bolts in the fork. Attach the upper bridge to the fork using the long bolt, the anchor bolt and the washer provided.

When the mudguards have been correctly adjusted, cut off any surplus parts of the stays, and slide the 6 provided, black rubber caps onto the ends for protection from any sharp edges. And for that smooth finish!

6. MOUNT

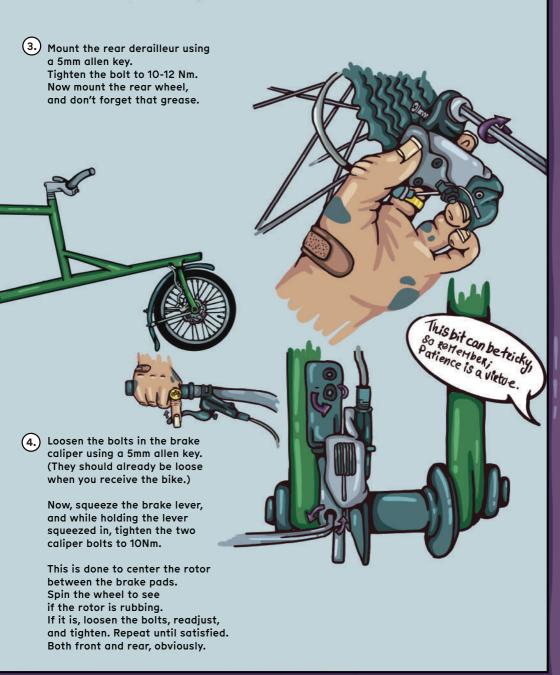

1. Mount the provided 160mm rotors on the wheels using the 12 torx 25 bolts. Tighten them to 6,2 Nm.
Look out for the arrows on the rotors, to make sure they are mounted correctly.

12 bolts! That's a lot!
A screwdriver with a torx bit is very handy here. Just make sure you get the tension right.

2. Remove the protective plastic inserts from the brake calipers. Mount the front wheel first, and make sure to grease the thru axle. Tighten the axle to 10 Nm maximum using a 6mm allen key.

ME WYEELS

7 MEBBING AND MOUNT THE RACK Having a hard time with the webbing? Scan the QR code for a video guide. The webbing is optional Mount the rack using a 6 mm allen key. Remember to grease the bolts and tighten them to 18-20 Nm. Make sure the front end of the rack faces front. And make sure to web up the rack before you mount it.
